operable program or batch file.
```

```
C:\Users\Hp>2
```

```
'2' is not recognized as an internal or external command,  
operable program or batch file.
```

```
C:\Users\Hp>color 3
```

```
C:\Users\Hp>|
```

```
Git CMD
C:\Users\Hp>color help
Sets the default console foreground and background colors.

COLOR [attr]

attr          Specifies color attribute of console output

Color attributes are specified by TWO hex digits -- the first
corresponds to the background; the second the foreground.  Each digit
can be any of the following values:

0 = Black      8 = Gray
1 = Blue       9 = Light Blue
2 = Green      A = Light Green
3 = Aqua       B = Light Aqua
4 = Red        C = Light Red
5 = Purple     D = Light Purple
6 = Yellow     E = Light Yellow
7 = White      F = Bright White

If no argument is given, this command restores the color to what it was
when CMD.EXE started.  This value either comes from the current console
window, the /T command line switch or from the DefaultColor registry
value.

The COLOR command sets ERRORLEVEL to 1 if an attempt is made to execute
the COLOR command with a foreground and background color that are the
same.

Example: "COLOR fc" produces light red on bright white

C:\Users\Hp>
C:\Users\Hp>3

Git CMD
/h          Hibernate the local computer.
           Can be used with the /f option.
/hybrid     Performs a shutdown of the computer and prepares it for fast startup.
           Must be used with /s option.
/fw         Combine with a shutdown option to cause the next boot to go to the
           firmware user interface.
/e          Document the reason for an unexpected shutdown of a computer.
/o          Go to the advanced boot options menu and restart the computer.
           Must be used with /r option.
/m \\computer Specify the target computer.
/t xxx      Set the time-out period before shutdown to xxx seconds.
           The valid range is 0-315360000 (10 years), with a default of 30.
           If the timeout period is greater than 0, the /f parameter is
           implied.
/c "comment" Comment on the reason for the restart or shutdown.
           Maximum of 512 characters allowed.
/f          Force running applications to close without forewarning users.
           The /f parameter is implied when a value greater than 0 is
           specified for the /t parameter.
/d [p|u:]xx:yy Provide the reason for the restart or shutdown.
           p indicates that the restart or shutdown is planned.
           u indicates that the reason is user defined.
           If neither p nor u is specified the restart or shutdown is
           unplanned.
           xx is the major reason number (positive integer less than 256).
           yy is the minor reason number (positive integer less than 65536).

Reasons on this computer:
(E = Expected U = Unexpected P = planned, C = customer defined)
Type   Major   Minor   Title
U       0       0       Other (Unplanned)
E       0       0       Other (Unplanned)
```

For more information on tools see the command-line reference in the online help.

C:\Users\Hp>shutdown

Usage: shutdown [/i | /l | /s | /sg | /r | /g | /a | /p | /h | /e | /o] [/hybrid] [/soft] [/fw] [/f]
[/m \\computer] [/t xxx] [/d [p|u:]xx:yy [/c "comment"]]

No args	Display help. This is the same as typing /?.
/?	Display help. This is the same as not typing any options.
/i	Display the graphical user interface (GUI). This must be the first option.
/l	Log off. This cannot be used with /m or /d options.
/s	Shutdown the computer.
/sg	Shutdown the computer. On the next boot, if Automatic Restart Sign-On is enabled, automatically sign in and lock last interactive user. After sign in, restart any registered applications.
/r	Full shutdown and restart the computer.
/g	Full shutdown and restart the computer. After the system is rebooted, if Automatic Restart Sign-On is enabled, automatically sign in and lock last interactive user. After sign in, restart any registered applications.
/a	Abort a system shutdown. This can only be used during the time-out period. Combine with /fw to clear any pending boots to firmware.
/p	Turn off the local computer with no time-out or warning. Can be used with /d and /f options.
/h	Hibernate the local computer. Can be used with the /f option.
/hybrid	Performs a shutdown of the computer and prepares it for fast startup. Must be used with /s option.
/fw	Combine with a shutdown option to cause the next boot to go to the firmware user interface.
/e	Document the reason for an unexpected shutdown of a computer.

```
tree
TYPE
VER
VERIFY
VOL
XCOPY
WMIC

Graphically displays the directory structure of a drive or
path.
Displays the contents of a text file.
Displays the Windows version.
Tells Windows whether to verify that your files are written
correctly to a disk.
Displays a disk volume label and serial number.
Copies files and directory trees.
Displays WMI information inside interactive command shell.

For more information on tools see the command-line reference in the online help.
```

PATH	Displays or sets a search path for executable files.
PAUSE	Suspends processing of a batch file and displays a message.
POPD	Restores the previous value of the current directory saved by PUSH.D.
PRINT	Prints a text file.
PROMPT	Changes the Windows command prompt.
PUSHD	Saves the current directory then changes it.
RD	Removes a directory.
RECOVER	Recovers readable information from a bad or defective disk.
REM	Records comments (remarks) in batch files or CONFIG.SYS.
REN	Renames a file or files.
RENAME	Renames a file or files.
REPLACE	Replaces files.
RMDIR	Removes a directory.
ROBOCOPY	Advanced utility to copy files and directory trees
SET	Displays, sets, or removes Windows environment variables.
SETLOCAL	Begins localization of environment changes in a batch file.
SC	Displays or configures services (background processes).
SCHTASKS	Schedules commands and programs to run on a computer.
SHIFT	Shifts the position of replaceable parameters in batch files.
SHUTDOWN	Allows proper local or remote shutdown of machine.
SORT	Sorts input.
START	Starts a separate window to run a specified program or command.
SUBST	Associates a path with a drive letter.
SYSTEMINFO	Displays machine specific properties and configuration.
TASKLIST	Displays all currently running tasks including services.
TASKKILL	Kill or stop a running process or application.
TIME	Displays or sets the system time.
TITLE	Sets the window title for a CMD.EXE session.
TREE	Graphically displays the directory structure of a drive or path.
TYPE	Displays the contents of a text file.
VER	Displays the Windows version.

Git CMD	
ERASE	Deletes one or more files.
EXIT	Quits the CMD.EXE program (command interpreter).
FC	Compares two files or sets of files, and displays the differences between them.
FIND	Searches for a text string in a file or files.
FINDSTR	Searches for strings in files.
FOR	Runs a specified command for each file in a set of files.
FORMAT	Formats a disk for use with Windows.
FSUTIL	Displays or configures the file system properties.
TYPE	Displays or modifies file types used in file extension associations.
CALL	Directs the Windows command interpreter to a labeled line in a batch program.
GPRESULT	Displays Group Policy information for machine or user.
GRAPHICS	Enables Windows to display an extended character set in graphics mode.
HELP	Provides Help information for Windows commands.
ICACLS	Display, modify, backup, or restore ACLs for files and directories.
IF	Performs conditional processing in batch programs.
LABEL	Creates, changes, or deletes the volume label of a disk.
MD	Creates a directory.
MKDIR	Creates a directory.
MKLINK	Creates Symbolic Links and Hard Links
MODE	Configures a system device.
MORE	Displays output one screen at a time.
MOVE	Moves one or more files from one directory to another directory.
OPENFILES	Displays files opened by remote users for a file share.
PATH	Displays or sets a search path for executable files.
PAUSE	Suspends processing of a batch file and displays a message.
PUSHD	Restores the previous value of the current directory saved by PUSHD.

```

C:\Users\Hp>help
For more information on a specific command, type HELP command-name
ASSOC      Displays or modifies file extension associations.
ATTRIB     Displays or changes file attributes.
BREAK      Sets or clears extended CTRL+C checking.
BCDEDIT    Sets properties in boot database to control boot loading.
CACLS      Displays or modifies access control lists (ACLs) of files.
CALL       Calls one batch program from another.
CD         Displays the name of or changes the current directory.
CHCP       Displays or sets the active code page number.
CHDIR      Displays the name of or changes the current directory.
CHKDSK     Checks a disk and displays a status report.
CHKNTFS    Displays or modifies the checking of disk at boot time.
CLS        Clears the screen.
CMD        Starts a new instance of the Windows command interpreter.
COLOR      Sets the default console foreground and background colors.
COMP       Compares the contents of two files or sets of files.
COMPACT    Displays or alters the compression of files on NTFS partitions.
CONVERT    Converts FAT volumes to NTFS. You cannot convert the
           current drive.
COPY       Copies one or more files to another location.
DATE       Displays or sets the date.
DEL        Deletes one or more files.
DIR         Displays a list of files and subdirectories in a directory.
DISKPART   Displays or configures Disk Partition properties.
DOSKEY     Edits command lines, recalls Windows commands, and
           creates macros.
DRIVERQUERY Displays current device driver status and properties.
ECHO       Displays messages, or turns command echoing on or off.
ENDLOCAL   Ends localization of environment changes in a batch file.
ERASE      Deletes one or more files.
EXIT       Quits the CMD.EXE program (command interpreter).

```
